SUPPLEMENTS

Our range of supplements is proudly gluten-free and crafted right here in the UK within GMP-certified facilities. We take great care to minimise the use of additives, all the while upholding the high standards of product quality and effectiveness. Whenever possible we prioritise allergen-free, organically-farmed, vegan and UK & European sourced ingredients, reflecting our commitment to ethical choices.

At the heart of our approach lies a dedication to well-founded science. We give precedence to ingredients that have a robust foundation in clinical research. Our products are meticulously formulated by a qualified product development team with a combined background in naturopathy, herbalism and nutrition, who deeply consider the intricate balance of the body's multiple microbiomes.
